# LEAK TESTING AS A SERVICE FOR BIPOLAR PLATES

**Our new bipolar plate testing service offers expert leak testing for prototypes and small runs, using advanced testing methods to ensure the reliability and performance of your components.**

### **Key Advantages:**

- + Fast results: Keep your project on track with efficient testing.
- + Expert support: Focus on development while we handle the testing.
- + Small investment needed: only leak test tooling without buying equipment / machinery.

### **Technical Specifications:**

- + Testing methods: Latest testing methods; simulate real operating conditions.
- + Leak rates: Down to  $1 \times 10^{-6}$  mbar·l/s.
- + Component sizes: Test objects up to 650 x 750 mm.
