

Capso

Version 1.4

Dry Ice Blasting

Pioneering Next Generation CO2 Utilization

A Comprehensive Showcase of our
Innovative Dry Ice Blasting Equipment

UNIDO Awarded

The United Nations Industrial Development Organization has awarded Capso's dry ice production and blasting equipment the Carbon-Neutral Technology and Solutions Award. Being awarded by UNIDO and promoted through its platforms is a significant mark of international credibility, as recognition from a United Nations agency signals that a company's technology meets high global standards for innovation, sustainability, and impact.

CE Certification

Every Capso product carries CE certification, confirming that the equipment complies with all applicable EU directives on safety, health, electromagnetic compatibility, and environmental protection. The CE mark permits free circulation within the European Economic Area and is granted only after rigorous third-party testing, technical documentation review (risk analysis, design drawings, user manuals), and issuance of an EU Declaration of Conformity. For customers, the label guarantees that the machine can be installed and operated in Europe without additional local approvals.

ISO 9001

Our manufacturing facilities operate under an ISO 9001:2015-certified quality-management system. This global standard mandates documented processes for design control, supplier qualification, production, inspection, corrective action, and continual improvement, all verified through regular external audits. Adhering to ISO 9001 ensures traceability of components, consistent build and performance across production runs, and a formal feedback loop that drives reliability and customer satisfaction.

DP-30KSH

Sharp

Upgraded System, Mass Blast, Smooth Spray

Efficient & Reliable

Various Applicabilities 24/7 Reliable

ISO 9001

In Conformity with GB/T19001-2016/ISO9001:2015

DP-30KSH Dry Ice Blaster

Power	450W
Power Supply	AC 220V 10A
Dimension	860mm x 610mm x 800mm
Weight	120kg
Standard Air Pressure	0.3-1Mpa
Standard Air Flow Rate	≥ 2m ³ /min
Dry Ice Flow Rate	0-3kg/min (Adjusted)
Dry Ice Dimension	Φ3mm

Accessories

Item	Ice Gun	Round Nozzle	Flat Nozzle	Fan Nozzle	Curving Nozzle	Ice Hose	Gas Hose	Pressure Regulator
Standard	—	—	35mm	—	45°	6m	10m	—
Configuration	■	■	■	■	■	■	■	■

■ Optional JET spotlight spray gun assembly

Three Intensities Adapt Various Conditions

Sharp

Upgraded System, Mass Blast, Smooth Spray

Suitable for cleaning the engine compartment and surfaces made of metal, ceramic, and other materials

Standard

Various Applicabilities 24/7 Reliability

Suitable for cleaning surfaces such as polymers, wood, hard rubber, etc.

Tender

Efficient & Harmless

Suitable for precision cleaning of circuit boards, mobile phone case cases, solar panels, cultural relics restoration, etc.

DPF-5 Dry Ice Snow Blaster

Power	300W
Power Supply	AC 220V 10A
Dimension	650 x 490 x 580 mm
Weight	80kg
Standard Air Pressure	0.2 — 1Mpa
Standard Air Flow Rate	≥0.6m³/min
Dry Ice Flow Rate	0 — 0.6kg/min
Dry Ice Dimension	≤ 300 x 150 x 150 mm

Accessories

								
Item	Ice Gun	Round Nozzle	Flat Nozzle	Fan Nozzle	Curving Nozzle	Ice Hose	Gas Hose	Pressure Regulator
Standard	—	3.5mm 4.5mm 7.5mm	7.5mm 8.5mm	10.5mm	5mm	5m	9m	—

Suitable for precision cleaning of circuit boards, mobile phone case cases, solar panels, cultural relics restoration, etc.

LCO2 Blasting Machine

Operating Temperature	10°C - 28°C (Suggested)
Power Supply	AC220V/ 5-15A/ 50Hz
Dimension	500mm x 450mm x 300mm
Weight	27.5KG
Standard Air Pressure	0.4-1Mpa
Standard Air Flow Rate	≥ 1 m³/min
Operating Air Pressure	4.5-7Mpa
Operating Air Flow Rate	1-50Kg/hr

MANUAL

Manual handheld operation, light and convenient, optional hot air system, no frost on the surface of the cleaned object, suitable for precision electronics, chips, and optical industries.

AUTOMATIC

Multiple devices can be connected in parallel to carry out automation system, modular design. All nozzles can be operated independently, and a single device can meet the cleaning needs of different specifications, which is convenient and energy-saving. It can be connected to independent LCO2 storage tank, booster system, long-distance transmission.
