

Turning CO₂ and Hydrogen Into RFNBO Methane

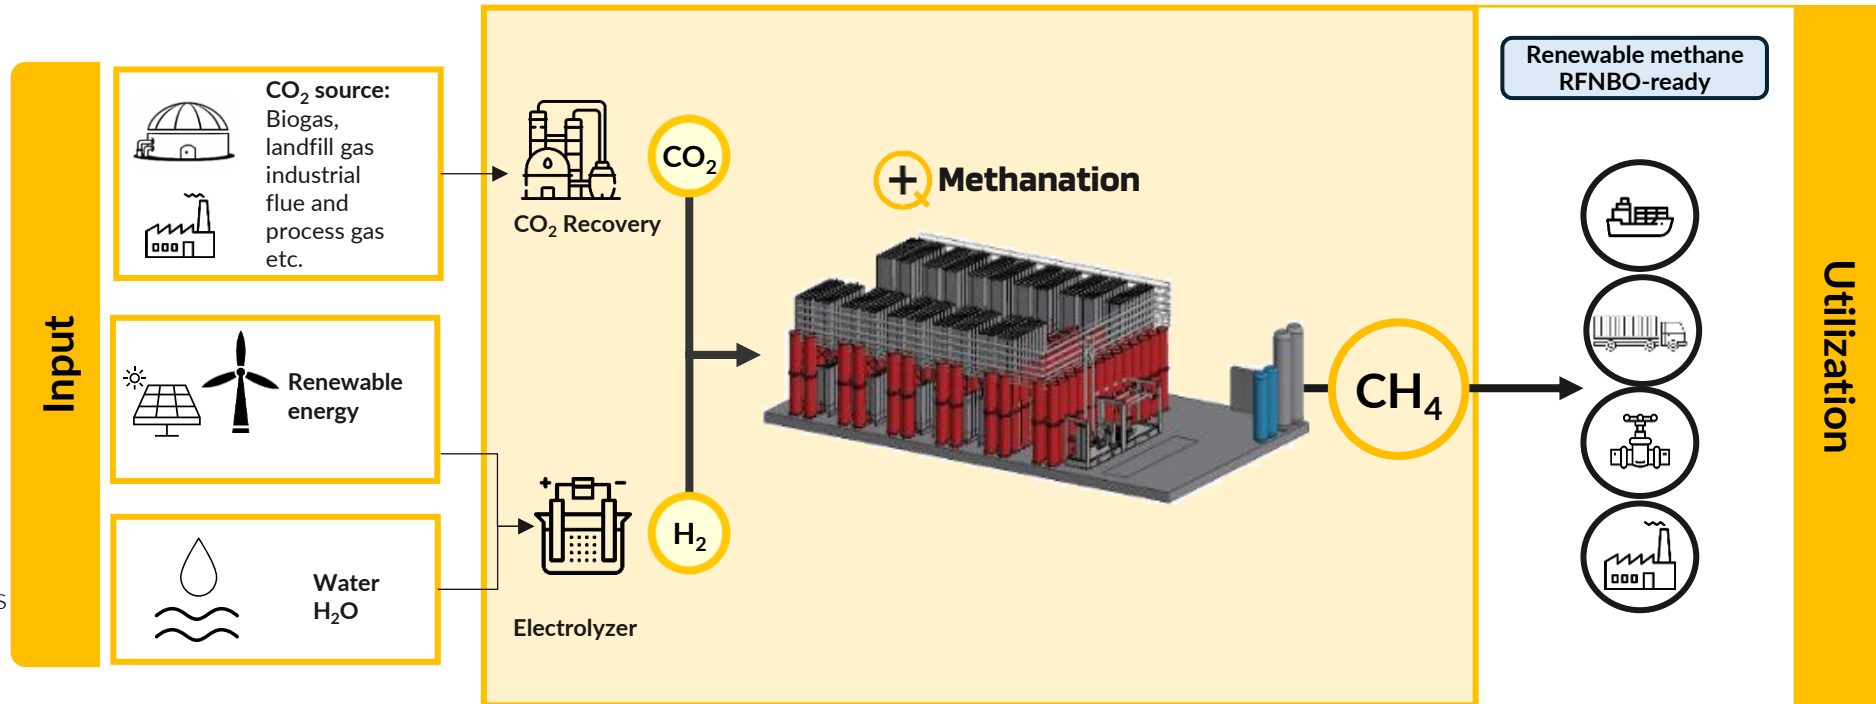

Solutions for plant integration with methanation

Biogas applications

- Integration to new and existing plants
- CO₂ utilisation from upgrading
- Direct integration with raw biogas

Industrial and syngas applications

- Process gas and flue gas integration
- Syngas methanation

Q Power Oy

Providing concrete solutions for fighting climate change

Technology provider for biological methanation and Power-to-X systems

- Proprietary solid-state biological methanation technology
- Integration with biogas, industrial CO₂ and hydrogen systems
- Turnkey delivery model, from process design to commissioning
- Founded on over 15 years of Power-to-X R&D and industrial experience
- Proven in industrial-scale projects, including eMethane plant delivery in Finland
- Privately owned, with main owners Ilkka Herlin and Saara Kankaanrinta
